for
XXXStudent's Name

I know XXXStudent's Name as my personal tutee throughout his university studies (2018-2022) and a student on my project YYY for Autumn 2020 – Spring 2021. Personal tutorial sessions when XXXStudent was first year included the completion of three mini-projects in groups and giving presentations, which XXXStudent engaged with nicely and got a rather strong mark for this.

Students on the YYY project read a chapter of an advanced undergraduate textbook, work out a few problems and write all up in a report. XXXStudent followed our meetings, read all the materials and participated in our discussions. His project was marked 67/100, meaning good work but space for improvements here and there. Ability of independent work and organising of the report were strong qualities noted during the project work.

I believe you will have seen XXXStudent's transcript. He completed his units with average to good marks; I'd like to point out *Mathematical Programming* which is a strong result of XXXStudent's and his choices of statistical-financial-optimisation units which shows a strong interest in these topics. He finished his integrated Undergraduate-Masters studies with us in Summer 2022 with a Second Class Honours (Second Division) degree of Mathematics with Statistics.

XXXStudent has a quiet, very polite and kind personality. I'm happy to recommend him for MSc studies in the ZZZ MSc program at WWW University.

Bristol, UK, 29th of October, 2024.
